The North Star was located in early history about 1860, very little work done and relocated in 1925, locator died and was located again in 1946 by present locators. While very little work done on claim, we holding it more for summer vacations, lots of water and trees on claim. The claim we believe has merit and with a mill on the ground, would develop in a paying proposition....

The same locators have a Kaolin claim located in The Current Mining district about 3 miles from The Current Postoffice that runs about 90% pure.

Work on claim about 30 foot shaft and croppings above show quite a deposit.

Not working at present account cheapness of the product and distances to places where used. Claims Alpha and Omega, located about 1940.

Mrs Margaret McM llin.
