Chemex Labs offers four mediums for digital data:

Bulletin Board System (BBS), Internet – Webtrieve, Internet E-mail, and floppy disk.

There are two types of BBS accounts for electronic data retrieval - **Geotrieve** and **Zip**.

GEOTRIEVE

The Geotrieve account is our simple data retrieval software on the VAX. Any computer type with terminal software and a modem can access it. It will allow you to list the files, view the data, dump (convert to ASCII format), and download.

Requirements:

- PC; terminal/communication software with either Xmodem, Kermit, or Standard protocol; modem

ZIP

The ZIP account is the option, which provides the fastest, simplest data retrieval method. Your data will be in a single compressed file, named ALL.ZIP. The file will contain new data, since last retrieval, in ASCII format, which enables you to import them into any spreadsheet software easily or view them in a text editor. You will need ZMODEM to retrieve the files and some software to unzip PKZIP files.

Requirements

- PC; terminal/communication software with ZMODEM protocol; software to unzip PKZIP files; a modem

WEBTRIEVE

The Webtrieve system uses Chemex Labs' Secure Internet Web Server to allow quick and easy access to a your data through Netscape Navigator, Internet Explorer or other compatible web browser. You can view and download data simply by pointing & clicking on the desired workorder. Data is encrypted using Netscape's Enterprise Server software, meaning information is safe and secure when travelling through the internet.

Requirements:

- PC (486, Pentium or greater) with 8 MB RAM OR Power Macintosh or Macintosh (68040 or greater) with 8 MB RAM
- 640x480 display (800x600 recommended), 256 colors (thousands of colors recommended)
- Internet connection: 14.4 kbps or greater (28.8 kbps recommended) modem
- Frames capable web browser - Netscape 2.0.2 or newer, Microsoft Internet Explorer 3.0.1 or newer
- PKZIP, WinZIP (FREE) or other compression software for PC users
- Stuffit Expander (FREE), Ziplt or other compression software for MAC users

Note: Browsers NOT recommended: AOL browsers, Compuserve

Browsers NOT compatible: LYNX, Mosaic

Please fill out the enclosed form indicating which type of service is preferred. There is no charge for digital data, with the exception of archived data – please contact Client Services at (604) 984-0221 for details.
