Los Angeles Office Report.

To Mr. A. P. Anderson, Field Engineer:

BIG EAGLE GROUP:

SEVEN TROUGHS DISTRICT, Humboldt County, Nevada.

PRESENTED, by Owner (by letter), W. Thos. P. Meader.

CONCLUSIONS: A mere prospect, adjoining the Fairview Mine. He makes no mention of any ore, but claims his ground contains an extension of some producing veins.

Am writing him you do not care to consider it.

ANSWERED ✓

Mr. A. P. Anderson:

Dear Sir:- Having been referred by your Mr. Winslow to you once before in regard to mining propositions I wish to present a proposition to you that merits your consideration.

I own free of all encumbrance and adverse claims the extension of the Fairview mine of the Seven Troughs Mining Co. situated in the Seven Troughs Mining Dist. Humboldt Co. Nevada. My property is known as the Big Eagle Group and consists of nearly 100 acres as you can see by enclosed sketch.

As the sketch shows the Fairview vein on which both the Fairview and Florence shafts were sunk extends across my property and the shaft running north from the Florence shaft are within 125 ft of my lines and then best ore has come out of that end of the claim. The ore in both the Fairview and Florence shafts is a free milling high-grade ^{gold} ore down to about the three hundred foot level. Below that the silver predominates and in the workings north of the Florence shaft good sized pockets of nearly pure ruby silver were encountered. Last February the Darby Mng. & Reduction Co. which is working the property of the Seven Troughs Mng. Co. under lease shipped a ton and a half over nineteen tons to the smelter of ore taken from the Florence workings that returned over three thousand dollars per ton.

* The data on the sketch will show you the approx. production of the two shafts and at what depth pay ore was encountered in each. The Darby people at present are erecting a hoisting plant of triple the present capacity upon the Fairview shaft and intend to sink to the one thousand foot level.

My property can be developed very economically, and a shaft sunk 1,500 ft. where indicated with laterals run to the east will surely open up the ore. I haven't the money to develop the property myself and the only work that has been done upon it is the necessary annual work. The work done on the adjoining property however has proved my ground beyond a doubt. The property will bear inspection in every way. I want to (if possible) retain an interest in the property and the proposition that I would like to make to you is this. I would like to have your smelting company purchase a three-quarter interest in the property for five thousand dollars they to do the development work, or failing in that if they want to own it outright I would be willing to give a bond and lease upon the property for twenty thousand dollars with an initial payment of twenty-five hundred dollars, the lease to run two years at a 20% royalty, the royalty to apply upon the purchase price.

I would like to request your careful consideration of this proposition and to invite an examination as the merits of the property will speak for themselves. I have the certified proofs of labor

and all necessary and the title is absolutely
clear.

Hoping for a favorable reply at an early
date I remain

Very truly yours

W. Thos. P. Maeder
